

Hot Water Heaters

With energy prices in a constant state of limbo its the prudent choice to be as efficient and economical with every energy dollar you spend. Many home owners don't realize that their hot water heater can account for 1/3 of their home's annual heating costs! Having hot water is just as important as a warm home, but why spend more than you really need to?

At Mitchell we understand the importance of keeping your energy costs low, and when it comes to hot water heaters we have a variety of Energy Star rated propane and oil-fired heaters in stock. Choose from some of the industry leaders: Bock, Rinnai, Lochinvar, and Bradford White.

Whether you're converting from an inefficient electric system or upgrading your current propane or oil-fired unit, let our heating experts point you in the right direction.
